## Keep Vulnerable ICU Patients Safe with OmniTom Mobile Bedside Imaging

**OmniTom** brings the power of advanced, multi-slice CT right to the bedside to safeguard your most vulnerable patients.

- **Less patient hospital exposure with go-anywhere battery operation**
- **Easy charging using standard wall outlet**
- **Improve workflow and patient safety by not moving patients on life support equipment**
- **Reduce risks associated with scatter radiation and integrated shielding**

- **Easy disinfection between uses**

OmniTom is an indispensable tool for collecting real time data on critically ill patients as well as for infectious disease screening, back up scanning and a full range of point-of-care needs.
